

Experience

- Over 30 Years of Quality Design in All Industries
- Energy Efficient and Reliable throughout Life of System
- Custom Designed Systems for Individual Applications
- Ranging From 0.25 HP to 500 HP Motors
- Built According to National Electric Code

Custom Panels

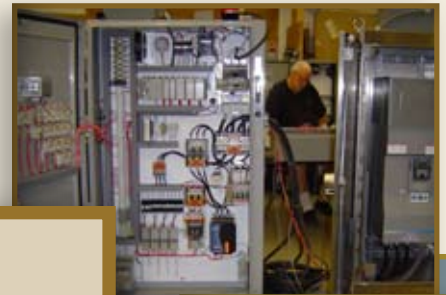

- Designed and Reviewed for Your Application
- AutoCAD Schematic Drawings
- Tested Under Power
- Enclosures - NEMA 3, 4, 4X, 7, 9 Hazardous
- Bill of Materials Provided

Panel Types

- Process and Motor Control Panels with Ethernet
- Push Button Stations
- Operator Consoles
- Emergency Panels
- HMI and National Instruments Panels
- PLC, Relay and AC/DC Panels
- Radio Controls – Installed or Stand Alone

Programmable Logic Controllers

- Analog or Digital Inputs and Outputs
- Easily Expandable
- AC/DC Power Supplies
- Ladder Logic Provided

IWI

INCORPORATED

CONTROLS

Industries Served*

- Material Handling
- Power Generation and Energy
- Food and Beverage
- Painting
- Steel
- Pharmaceuticals
- Automotive

*Not limited to listing seen here

Data Logging

- Wired and Wireless
- For Silos, Baghouses and Dust Collectors
- Temperature, CO and CO₂ Sensors
- Differential Pressure Sensors
- Broken Bag/Leak Detection Alarms
- Smoke Detections/Spark Ignition
- Meet EPA, MACT and OSHA Requirements

Consta-Flow Motor Control

- Minimize Energy Use – Green Solution
- Maintains Constant Flow – Regardless of Conditions
- Optimizes System Performance
- Maximize Bearing, Sheave and Belt Life
- Reduce Electricity – Save Money

UL Certificates

- UL 508A Industrial Control Panels
- Intrinsically Safe Circuit Extensions in Hazardous Locations
- Industrial Control Panels for use in Hazardous Locations
